Debriefing MyBand project

By: Robbe van der Lee, MD1A
For: Miloš Despotović, Theo den Blanken, Ed Schenk, Hidde Braun, Erik Willems, Gerrit Tijhof from Mediacollege Amsterdam

I will realise the MyBand project in the form of a website for the popular online D&D stream "The Chain". This website will be aimed at all fans of the show, young and old. On the site they will find information about the shows characters, an agenda for the upcoming streams and events and a little something about the voice actors behind those characters.

This website will follow the less is more design route and with this I hope to make a simple and easy to navigate. What I see with a lot of these club or organisation websites is that there is a lot of information at the same time and this way you can't really focus on the information given.

The project is divided in sprints and at the end of each sprint I will show you what I have done and what I still have to do. This way you will stay updated on what you are paying for and you can stop me in time if there are any problems with the website.

With kind regards,

Robbe van der Lee
